Subject: RE: 09/490,064

Lori,

The applicant will need to provide a new paper copy. Both the parent, 09/025,769 and the child, 09/490,064 have 373 sequences, the paper copy needs to have the same number. Also, the CRF is in the old sequence rules format so, the paper copy needs to have the same format.

Thank you,
Mark

Hi Mark,

I had e-mailed you regarding this application last week. Perhaps it did not go through. Anyway, I was asking for help because the Printer Rush states that the paper copy in the parent has 273 sequences and this application only has 271 sequences on the paper copy. Do you have any suggestions about what to do? Do I request a new paper copy from applicant? They state that the CRF and paper are the same, which were both transferred from the parent to this application. Thanks for any help you can give.

Sincerely,

Lori
